KENDU

Ceiling lightboxes

Ceiling lightboxes transform the space into a powerful tool for retail communication, combining high-quality illumination with a clean architectural presence.

More than a lighting solution, they help define spaces, navigate customer journeys and create visual focus. Their uniform illumination enhances product display, brings clarity and consistency to retail environments, and contributes to a distinctive in-store ambience.

Designed to adapt to different store concepts, ceiling lightboxes add depth, balance and visual impact while creating a contemporary and immersive atmosphere.

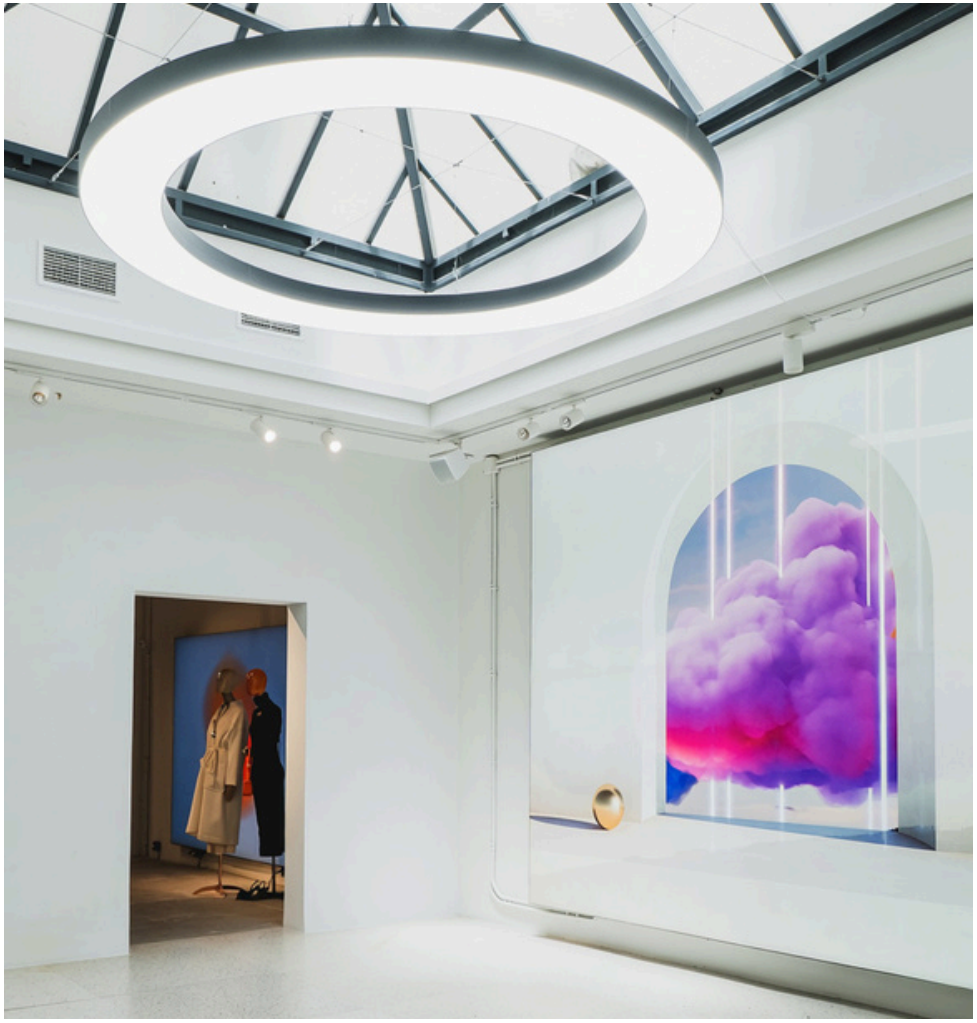

Transform your retail environment

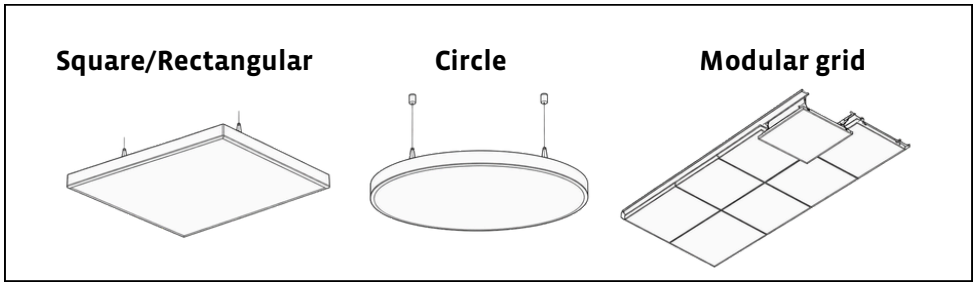

SKATER

Shapes

Available in rectangular, circular and modular configurations, with custom dimensions and continuous formats up to 5 × 50 m, to suit every retail environment.

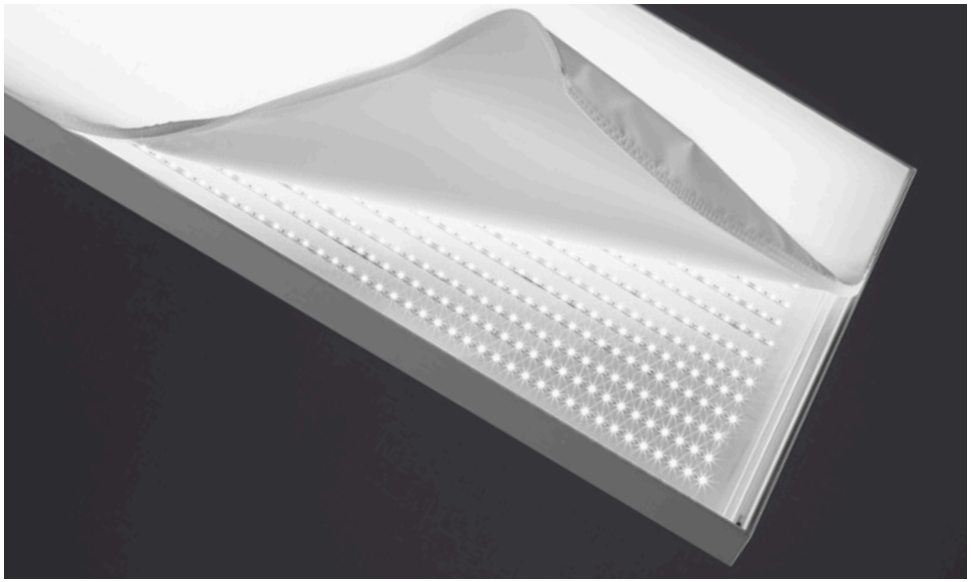

LED lighting

Designed for uniform, glare-free illumination, our LED system delivers excellent colour rendering (CRI >90) and consistent light diffusion across the entire surface. Built to last and compliant with European circular economy regulations, the system is 100% recyclable and designed for easy maintenance.

Lighting options

LIGHT COLOUR

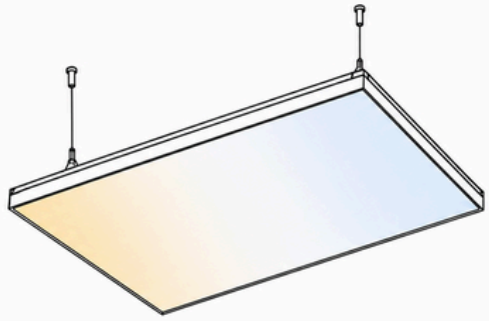

Monocolour White LED

Tunable White

1800K	6500K
Warm white	Cool white

LIGHT DENSITY

MEDIUM	(8 LED strips per m2)	73W	8080Lm
HIGH	(10 LED strips per m2)	90W	10100Lm
VERY HIGH	(15 LED strips per m2)	138W	15150Lm

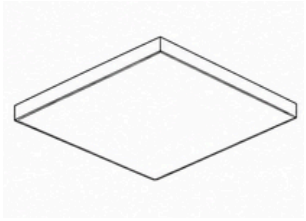

Mounting options

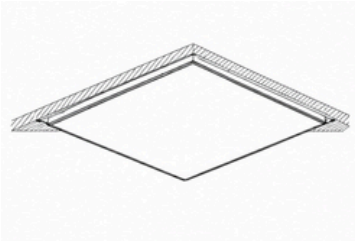

Designed to adapt to every space, our ceiling lightboxes offer flexible mounting options for seamless integration. Each configuration helps enhance campaign visibility and create a distinctive presence in key retail areas. Choose the configuration that best suits your space and architectural needs.

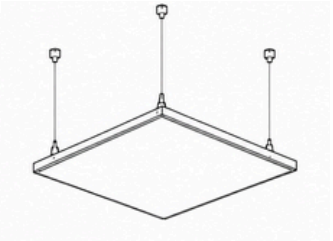

Surface-mounted

Recessed

Wood finish

Laminated wood finish

In addition to the standard aluminium finish, ceiling lightboxes can be customised with a laminated wood finish, adding warmth and character while maintaining a clean, contemporary look.

Need a bespoke project?

Beyond our standard solutions, we can develop fully customised ceiling lightboxes to meet your specific project needs.

From the initial briefing and concept development to design, manufacturing and installation, our team works alongside you throughout the entire process, delivering a solution that brings your vision to life.

Custom geometries

Oval · Donut-shaped · Organic forms

Custom lighting

RGB Digital Dynamic

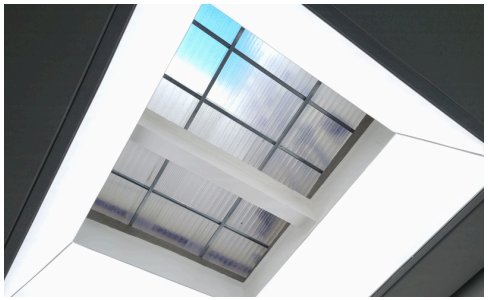

Dynamic colour for customised lighting experiencies.

Get inspired!

Explore different ways to integrate ceiling lightboxes into retail environments, combining light, form and architecture to create distinctive and engaging spaces.

Why Kendu?

At Kendu, we bring together design, innovation, global capacity and a strong commitment to sustainability to deliver high-impact solutions for today's retail challenges.

Design

We create versatile solutions that adapt to the fast-changing needs of retail, combining functionality with premium design.

Innovation

Innovation is in our dna. We fuse design, technology and retail expertise to deliver future-ready and connected solutions.

Expertise

25 years of experience working for some of the world's most prestigious retail brands worldwide.

Global service

Our international presence ensures seamless coordination, local adaptation and on-time execution in multiple markets.

Manufacturing capacity

Four factories across Europe, USA and LATAM give us the scale and flexibility to support global rollouts with speed and reliability.

Highest quality

We meet the highest standards in product and service quality. Ensuring consistency, durability and trust across every project.

Sustainability

We lead the change toward more sustainable retail through eco-design certified products and more sustainable campaigns.
